Profile

A result-driven Front-End Developer with 5.6 years of experience, specializing in UI design, web development, single-page applications and JavaScript. Adept at performing quality assurance testing for web applications and an active react community member.

Experience

I-Exceed Technology Solutions, Bengaluru /

Software Engineer

March 2022 - Present, Bengaluru

In my current role at I-Exceed, I serve as a React Developer, utilizing my expertise in Material UI and Styled Components to develop user interfaces for a cloud-based IDE product. Alongside my development responsibilities, I have also taken ownership of writing comprehensive unit tests to ensure the quality and reliability of our software. Working within an agile framework, I thrive in collaborative environments, actively contributing as a team player while maintaining a self-motivated approach to achieve project goals.

IS Infotech, Bengaluru /

Software Engineer

July 2020 - March 2022, Bengaluru

At IS Infotech, I built websites using React JS and developed a product influencer management system. The website showcased a responsive and dynamic user interface, while the management system streamlined influencer collaboration and campaign tracking.

Silicon Media Technologies, Bengaluru /

Research Analyst

March 2017- November 2019, Bengaluru

- Performed Primary and Secondary research for clients.
- Conducted SWOT analysis and generated reports. Collected data from various platforms and conducted competitor analysis.

Education

GM Institute Of Technology, Davangere

Sept 2012- May 2016, Davangere

St.Aloysius PU College, Mangaluru / Pre-University

June 2010 - May 2012, Mangaluru

Skills

Frontend Development

- Proficient in React JS, utilizing its powerful features for building dynamic user interfaces.
- Strong command of HTML, CSS, and JavaScript, ensuring solid foundational knowledge for front-end development.
- Skilled in Material UI, effectively implementing its components and design principles to create visually appealing and responsive user interfaces.
- Experienced in Redux, employing its state management capabilities to efficiently handle complex application data.
- Proficient in writing unit tests using Jest, ensuring code quality and promoting software reliability.
- Strong troubleshooting and debugging skills to identify and resolve issues.

Backend Developer

- Skilled in consuming REST services, effectively integrating and interacting with external APIs to retrieve and process data.
- Proficient in working with CouchDB and PouchDB, utilizing their NoSQL database capabilities to store and retrieve data in a flexible and scalable manner.
- Experienced in user authentication using Keycloak, implementing secure authentication and authorization mechanisms to protect backend services and resources.

DevOps

- Proficient in version control systems like Git, utilizing branching, merging, and pull requests to effectively manage codebase and collaborate with team members.
- Adequate knowledge in web server configurations of Apache & Nginx

- Knowledge of cloud platform like AWS utilizing their services for infrastructure provisioning, deployment, and management.
- Strong troubleshooting and debugging skills to identify and resolve issues related to deployment, infrastructure, and environment configuration.

Interpersonal & Project Management

- Excellent communication and interpersonal skills, facilitating effective collaboration and clear communication with team members, stakeholders.
- Proficient in project management methodologies, such as Agile, Scrum, Kanban with hands-on experience utilizing Jira as a project management tool, enabling efficient planning, organization, and prioritization of tasks and deliverables.
- Work with teams and mentor novice developers
- Good communication skills

Projects

Appzillon Cloud IDE

Technology Used - React, material-ui, jest, react-testing-library, redux, CouchDB and PouchDB, Jira.

Roles - In the project, I took on the role of a React developer, proficient in Material-UI, Jest, React Testing Library, Redux, CouchDB, and PouchDB, to build robust and user-friendly applications.

React Device Emulator for Cloud IDE

Technology Used - React, material-ui, jest, react-testing-library, redux, CouchDB and PouchDB,

Roles - In the project, your role involves developing and implementing a React device emulator for a cloud web IDE product, enabling users to seamlessly simulate various devices and test their applications with ease.

Digital Onboarding - XAC Bank

Technology Used - React, material-ui, jest, react-testing-library, graphql, apollo cli, styled-component, Jira.

Roles - As a frontend React developer, my role in the project involved utilizing technologies such as React, Material-UI, Jest, React Testing

Library, GraphQL, Apollo CLI, and Styled Components to build visually appealing and functional UI screens based on design specifications from Figma.

ScrollLab Influencer Management

Technology Used - React, material-ui, styled- component

Roles - In the project, my role entails designing and implementing an influencer management system, enabling efficient campaign tracking and providing comprehensive analytics to measure the success and impact of influencer marketing campaigns.
